

XHTML Page

For your set of assignments in this class you will be building a set of XHTML pages of biographical information that week-by-week you will be implementing the fundamentals of Cascading Style Sheets:

- 1) To start with, you need to create an XHTML page that includes a logo (or name), a headline and some body text:

- 2) This XHTML page will contain no Style Sheet information at this time:

- 3) Once completed, print out the browser screen and code to turn in as your **XHTML Page** assignment.
