

New Window

Your second assignment will contain a new window that you will link to from a web page.

- 1) Your **New Window** assignment should contain:
 - A) an HTML page that contains your new window function within your script tag
 - B) a user event located within a link tag that will open the new window to specific parameters
 - C) the HTML page that will be opened with the parameters of the page written as text
- 2) This shall be done in the code editor of your choice and printed out to be turned in as your **New Window** assignment.
