**Box Styles**

Now that you have created text styles, lets work on creating your box models with your Cascading Style Sheets.
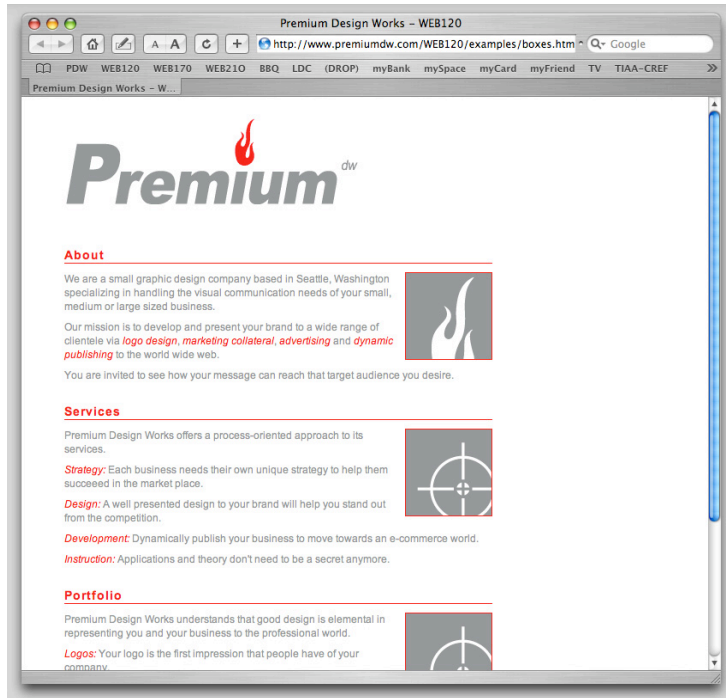

1)   **Open your XHTML page that includes text done with Cascading Style Sheets:**

2)   **Now, lets implement our box model into our XHTML page via our Cascading Style Sheet:**

3) Lets also add images within our sets of body copy:

4) Once completed, print out the browser screen and code to turn in as your **Box Styles** assignment:
