Cascading Styles
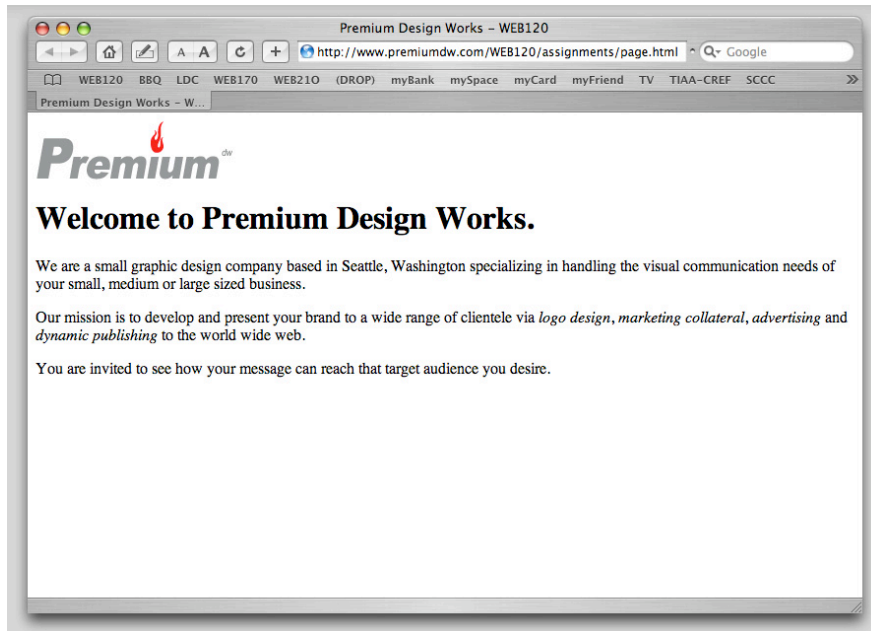

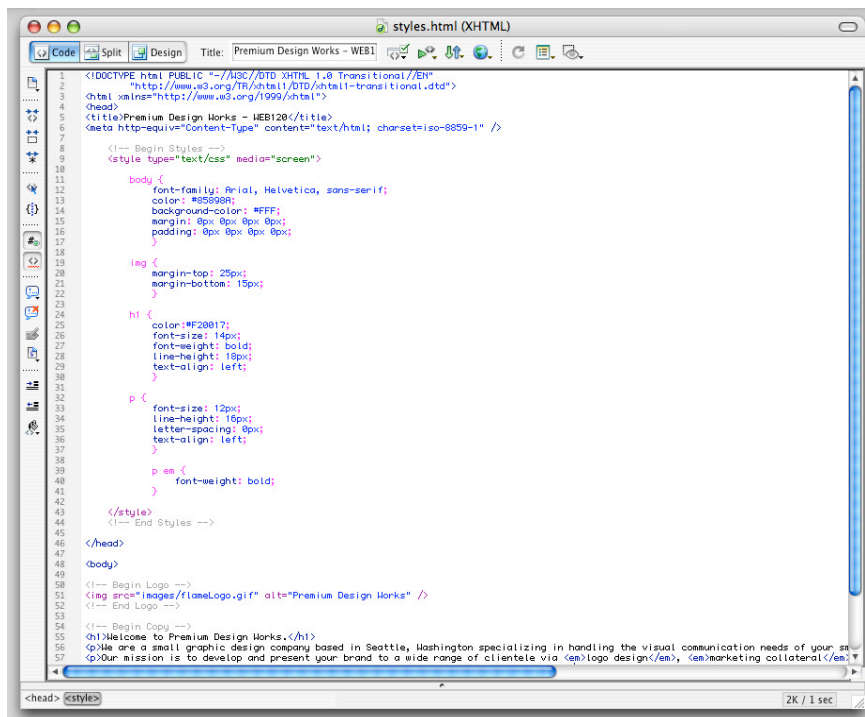

Now that you have built your (first) XHTML page of biographical information, you need to start implementing the fundamentals of Cascading Style Sheets:

1) Open your XHTML page that includes a logo (or name), a headline and some body text:

2) Now, lets write a simple (embedded) Style Sheet to control the presentation of your XHTML:

3)   Once completed, print out the browser screen and code to turn in as your **Cascading Styles** assignment:
