Create & Use an Image

Let's find an image and put it in our page:

1) Your **Create & Use an Image** assignment should contain an image of yourself that you will:

- open
- re-size & crop
- save for web
- place in your HTML file

2) This shall be done using PhotoShop, written in a standard text editor and printed out to be turned in as your **Create & Use an Image** assignment.
